

## Report from HMS Scott,

For several years the Company has enjoyed a link with HMS Scott.

Commander Gary Hesling writes about the ship's work period in Antarctica.

*"After my two years on ENDURANCE I never thought that I would get the opportunity to visit Antarctica again. ...it went very well, although the weather at times conspired against us, as it does, and I am sure dodging icebergs in the fog has aged me by 10 years!"*

*As I write, we are heading to the warmer waters of South Africa and for a period of well earned and needed maintenance after operations in the south Atlantic and Antarctic Peninsula. "*
