

WATER CONSERVATORS

GOLF DAY

On a dry and warm, Wednesday 18th September the annual Water Conservators' Golf Day was held at Leatherhead Golf Club. The enthusiastic players were most remarkable for the proportion who professed to require a handicap over 20! It turned out that several of us needed considerably more than that!

The course was in excellent condition, the weather was fair and the company was excellent, so I believe despite the scoring, all concerned enjoyed their golf which was followed by sandwiches and prize-giving in the club afterwards.

The two Rogers showed us how we should be playing with 35 Stableford points each. On count back Roger Harris just lost out to Roger North who was duly awarded the Bill Smith Cup (again).

We hope more members will be able to join us next year. We also intend to put Water Conservator teams into two Livery Company competitions next year. If David Johnstone can make it for his second round in 40 years, then no member should consider his rustiness as a problem. Well done David.
