

## Virtual Wine Tasting Evening

15<sup>th</sup> October 2020

Master Rob Casey created the Water Conservators first virtual social event on Thursday 15<sup>th</sup> October when he led a Virtual Wine Tasting evening for Members and their partners. It was a great success!

Past Master Simon Catford was responsible for managing the Zoom technicalities that enabled all participants to start and finish the evening together, but breaking off into a number of sub-groups to discuss the wine.

Each participant (or couple) were asked to bring a bottle of wine of their choice and to present it to their sub-group with details of provenance, key features, alcoholic content and price. Each sub-group then voted for the “best value” wine in their group and these votes were accumulated by the Master during the evening with the intention of awarding a £25 gift voucher to the winner. Unfortunately, there was little agreement on the winning wine, so the Master awarded the prize to the Water Conservation Trust!

A very successful evening where it was great fun to engage with other Members who had not met up since early 2020. The Master was encouraged to arrange a similar event around the Christmas/New Year period – keep an eye on our website for details!
